

Alexey Tarantovich

Product Designer / UX Architect

With 6+ years of experience in B2B SaaS and complex product systems. I design product logic, user flows, permissions, forms, admin interfaces, dashboards, and AI-assisted workflows.

EXPERIENCE

01

Nov 2020 — Present

ONLYOFFICE B2B SaaS

Lead UX/Product Designer / Product Architect

Product platform for document collaboration, rooms, forms, permissions, AI features, and enterprise workflows.

- Designed complex B2B product workflows for ONLYOFFICE DocSpace, including rooms, forms, permissions, admin settings, dashboards, and AI-assisted product scenarios.
- Led UX architecture for form-related workflows: form creation, sharing, filling, result storage, drafts, completion states, and user access logic across different room types.
- Shaped product logic for role-based permissions and access settings, balancing user needs, admin control, security constraints, and engineering feasibility.
- Worked closely with product managers, developers, QA, and stakeholders to clarify requirements, define edge cases, document behavior, and prepare release-ready design solutions.
- Designed user flows and interface logic for AI-related features, including AI chat behavior, model selection, AI agents, AI Rooms concepts, and AI-assisted form workflows.
- Improved design consistency and delivery quality by working with reusable patterns, structured Figma files, design system components, and detailed developer handoff.

Before 2020

Previous experience

UX/UI Designer / Web Designer / Marketing & Web Projects

- Designed and delivered websites, landing pages, and digital interfaces for business and marketing needs.
- Worked across design, sales, marketing, and web development contexts, building a practical understanding of business goals, client communication, and implementation constraints.
- Developed a strong foundation in HTML/CSS basics, website structure, digital communication, and user-facing product presentation.

SKILLS

06

Product & UX

Product discovery · UX architecture · Product logic · User flows · Task flows · Information architecture · Complex forms · Permissions & roles · Admin interfaces · Dashboards · Prototyping · Developer handoff

Research & Thinking

Problem framing · Hypothesis validation · Respondent recruitment · User interviews · Feedback analysis · Research synthesis · Feature prioritization input · Edge cases · Data-informed decisions · Iteration from feedback

Collaboration & Tools

Cross-functional collaboration · Working with engineers · Stakeholder alignment · Explaining design decisions · Figma · FigJam · Jira / Linear · Notion / Docs · ChatGPT / Claude / Gemini · HTML / CSS basics
